SUMMARY

Informatics graduate from Universitas Sebelas April, focused on web and mobile application development, backend systems, and AI integration. Experienced in developing independent projects and information systems using Flutter, Laravel, JavaScript, Python, and Firebase, including a digital examination platform, institutional websites, and an AI-powered travel planning application. Familiar with REST API development, database management, and cloud deployment. Interested in building innovative, scalable, and impactful digital solutions.

EXPERIENCE

Fakultas Ekonomi dan Bisnis (FEB) UNSAP Sumedang, Indonesia

Full-Stack Developer Nov 2025 - May 2026

- Redesigned and redeveloped the official faculty website using Laravel, PHP, MySQL, and Tailwind CSS to improve its interface and presentation of academic information.
- Designed and developed SIPENA, a digital examination and attendance platform integrating Flutter, React, and Firebase.
- Implemented real-time attendance monitoring with 10-second heartbeat tracking and background activity detection.
- Integrated automated PDF generation for attendance records and examination reports, along with Firebase Cloud Messaging (FCM) notifications.
- Developed content management features for faculty news, lecturer profiles, academic information, and institutional activities.

KKN Tematik Desa Serang – Universitas Sebelas April Sumedang, Indonesia

Web Developer & Digital Documentation Jan 2026 - Feb 2026

- Developed a digital storefront and product catalog for Dapoer Sari Pohaci, a local micro, small, and medium enterprise (MSME).
- Integrated WhatsApp ordering to simplify customer inquiries and orders.
- Organized digital documentation and multimedia archives to support community program reporting and promotion.

PROJECTS AND COMMUNITY

Jelajah Nusantara AI – AI-Powered Travel Planner 2026

Developed an AI-powered travel planning web application using JavaScript, Vite, Node.js, Express, and Firebase. Integrated the DeepSeek API to generate travel itineraries, Leaflet.js for map visualization, and Chart.js for budget visualization. Deployed the application on Vercel.

CGMI Assessment App – Civic GovTech Platform 2026

Developed a web-based assessment platform for evaluating collaborative governance in Sumedang. Implemented 30 indicators across six dimensions, automated scoring, and radar chart visualization. Integrated Firestore, respondent access codes, and Google OAuth-based administrator access.

Sentiment Analysis – Machine Learning Research 2026

Conducted sentiment analysis of Indonesian YouTube comments concerning the public controversy surrounding Joko Widodo's academic degree. Applied TF-IDF feature extraction and Support Vector Machine (SVM) with an RBF kernel. Developed a web interface using React and a backend API using FastAPI.

Google Cloud Skills & Technology Programs 2025 - 2026

Completed Google Cloud Computing Foundations learning activities and earned 10,195 points in the Gold League. Completed Google Cloud skill badges related to load balancing, secure networking, application development, and machine learning APIs. Participated in #JuaraVibeCoding Study Jam by Google Developer Groups (GDG), May 2026. Attended the Digital Literacy Seminar for University Students organized by Indonesia's Ministry of Communication and Informatics, 2024.

EDUCATION

Universitas Sebelas April (UNSAP) Sumedang, Indonesia

Bachelor's Degree in Informatics (S.Kom.), GPA 3.52 2022 - 2026

SKILLS

- **Programming Languages:** JavaScript, TypeScript, Dart, PHP, Python, HTML5, CSS3, SQL
- **Frontend Development:** React, Vite, Tailwind CSS, Responsive UI, Progressive Web Apps (PWA)
- **Mobile Development:** Flutter, Dart, Android, Cross-Platform Development
- **Backend Development:** Laravel, Node.js, Express.js, FastAPI, REST APIs, Firebase Cloud Functions
- **Database & Cloud:** MySQL, Cloud Firestore, Firebase Realtime Database, Firebase Authentication, Firebase Hosting, Firebase Cloud Messaging, Google Cloud
- **AI & Data Analysis:** Scikit-learn, SVM, TF-IDF, Natural Language Processing (NLP), PySastrawi, LLM API Integration, PLS-SEM
- **Tools & Practices:** Git, GitHub, Postman, Chart.js, Leaflet.js, System Architecture, Agile/Scrum
